RHODODENDRONS AT MOUNT HOOD, OREGON

Photographs by Irving B. Lincoln

You Are Welcome to **Scenic LINDUM GARDENS**

For the past several years I have been collecting from Europe and Canada and the United States, the World's finest varieties of Rhododendrons and Hardy Azaleas. Over 350 varieties are now growing on my hillsides in one of the Nation's largest and finest collections displayed in a most scenic setting.

Imported from the gardens of Europe and grown here in fine soil, or propagated here, these choice varieties of Rhododendrons and Azaleas are now available to you in our Nursery to add to the splendor of your garden.

PICK OUT YOUR OWN PLANTS

You are welcome at any time to see this display and to pick out your own plants in the Nursery from a stock of over 35,000 plants. Both the imported plants and those propagated here from fine stock have been grown in very fine soil and have a well established root system. The plants are of the finest quality.

PLANTING NOTES

Rhododendrons will grow in any soil that does not contain lime, is porous without being dry and is fairly rich in humus. They have a close, fibrous root system and if well watered, can be transplanted almost any time, but the best seasons are from September to June, preferably in the Fall and Spring. Plant them not more than an inch deeper than they were planted in the Nursery, in a mixture of Peat Moss or other humus and good top soil, preferably half and half, mixed in a hole 3 feet in diameter by 20 inches deep. If the soil is clay or very poor, remove the soil to a depth of 18", put in good leaf mold, top soil, humus and peat. Cut out tree roots. Avoid heavy muck or loam without air in the soil. Use good soil and little fertilizer. After planting, mulch with leaves, leaf mold, or well rotted cow manure. They will not grow in alkaline soil. A little fertilizer in the Spring when the new growth starts, is advisable to most varieties. Remove seed pods as soon as blooms have faded.

DESCRIPTIONS, GRADES, AND PRICES

It is difficult to describe the size, shape and quality of all plants in a general list. A slow growing, compact, spreading plant, like Britannia or Unique is worth more in a 15-18" plant, than a tall rangy growing plant like Beauty of Littleworth, Pink Pearl, Antoon Van Welie or Sappho. Therefore, in placing a price on a plant, consideration will be given to its comparative size value.

Plants especially selected at the nursery will be priced according to their shape and value irrespective of the general prices in this list.

VARIETIES

I am endeavoring to have the finest possible list of hardy reliable Rhododendrons and Azaleas for general planting. I have not listed this year some varieties that I do not consider up to standard for general use nor some with little demand. A few new ones have been added.

PORTLAND HARDINESS RATING

After the cold winter of 1949-50 when the temperature here dropped for a long period from -5° to -16° in most nurseries, the American Rhododendron Society sent a questionnaire to its members to determine the damage caused by the cold and the degrees of coldness different varieties would stand. From the results many varieties were rated. These were rated as given below (H-2) based on the minimum temperatures which the variety given may be expected to stand with no injury to leaf, stem or bud. Where the variety is rated it is given after the English rating. These ratings are as follows:

H-1—Varieties hardy to -25° F

These varieties should be hardy in southern New York and southern New England.

H-2—Hardy to -15° F

H-3—Hardy to -5° F

These varieties should be fairly hardy in the southern party of Long Island, Cincinnati, Washington and around Philadelphia.

H-4—Hardy to 5° F

H-5—Hardy to 15° F

These varieties should be hardy during most winters in the Portland and Seattle areas.

AZALEA HARDINESS

The Azaleas listed are much more hardy than most of the Rhododendrons. The Ghents and most of the others will stand the winters of Mid-West and Lake States. The Malvatica Evergreens have been grown in Ohio, Illinois and Michigan. To stand the dry summers of the Inland States they need part shade.

Thank you for the nice plants you shipped me on the last order.

April, 1955

I wish to thank you for such generous grading and such nicely grown and packed plants. I have always found that every plant from you is a little better than I had expected—and so many others it is the reverse. Many thanks again for your kindness.

April, 1957

The Rhododendrons you shipped me are all growing and are flowered as if they had been here all along—instead of having just come across the country. Neighbors and friends, who have seen these plants, have asked about some.

June, 1955

The plants are very fine and, as always, they come across the country in very splendid shape.

SIZES

Sizes of plants change every year, but I do not get out a catalogue only about every three years. I try and have all sizes, but they may vary from year to year. If a plant is below standard for that variety, it will be graded and priced one size smaller. But extra bushy plants will be graded to larger sizes as follows:

EXTRA BUSHY PLANTS

Extra bushy plants will be priced the same as a higher size and more than extra bushy plants, will be the same as two sizes higher. In general large size plants over 18" will be priced according to their shape, bushiness and real value and not just their height.

SYMBOLS

First Class Certificates (FCC); Awards of Merit (AM); Hardiness ratings (B) and Stars * were given by the Royal Horticultural Society of England. Stars in parenthesis (***) my rating. Blooming seasons as a rule are from March to June and plants are marked (VE); (E) early; (ME) medium early; (M) mid-season; (ML) medium late; (L) late; and (VL) very late. Most varieties will stand full sun if kept watered, but prefer part shade. Some varieties require part shade with plenty of daylight and in dry, hot areas of the East and Mid-West, part shade is essential.

Where the variety is not too new to be rated, the stars (*) indicate the quality rating given in England. Our opinion may be different.

The range in the hardiness of the Rhododendrons (English rating) is marked (AA), (A), (B), (C), (D) and (E). (AA) "Iron Clads" for northern United States. (A) will stand full exposure to sun and cold. (B) Medium hardy. (C) is hardy West of the Cascades and should have partial shade in most cases. (D) and (E) are tender.

Growers in Long Island, New Jersey, Delaware, Maryland, Virginia and Kentucky report that plants rated (A) and (B) should succeed there in part shade. (AA) are the "Iron Clads" for the colder parts of the East, Mid-West and Northern States.

TERMS OF SALE

Net Cash.

Prices f.o.b. Nursery.

There is no charge for packing materials.

When plants are ordered shipped, payment should accompany the order and the plants will be shipped promptly, in planting seasons, in good condition, either by Express, or Auto Freight, Collect. Plants will be shipped to any part of the United States.

SAPPHO — White with Large Blotch

I want to thank you for the fine Rhododendrons which we received. Have planted them and two or three are now blooming. Also, I want to thank you for making the selection for me.

R. Hugh Uhlman
Missouri

Received the two Rhododendrons which I ordered, in fine condition and they are wonderful plants. Thank you.

Mrs. Geo. Gateson
Washington

You will be interested to know that the Sappho and Queen Mary, which I ordered last year, are growing nicely, having survived a very severe drought last summer and winter weather with temperatures down to 0° and drying winds. I watered them, of course.

William Koch
Delaware

The Rhododendron I ordered from you a short time ago arrived in perfect condition—not even a leaf damaged. The plant is a fine one.

Mrs. James Haislip
West Virginia

PURPLE SPLENDOR — Royal Purple with Dark Blotch

Irving B. Lincoln • Portland, Oregon

VULCAN — Hardy Late Red

I am happy to say that all the plants you shipped to me last Spring and this Fall are doing very well, despite the very cold spell we had a month ago when it went as low as 7 below. I believe a great deal has to do with the very healthy and beautiful plants you have been sending me, because I have had the so-called ironclads purchased locally not thrive as nice as your specimens. Your method of packing also is very desirable, since the plants always arrive in good shape and the crate doesn't outweigh the plants, which is so often the case, thereby making the shipping costs prohibitive.

George E. Staehle, M.D.
New Jersey

I wish to place an order for six more plants. I also want you to know that I was very pleased with the plants purchased from you early this spring. They have done well in spite of our dry, hot summer this year. I have never seen such beautiful blooms.

Mrs. Lester R. Brown
North Carolina

The shipment arrived without delay, the plants being in perfect condition. The plants are now growing fine and they are positively beautiful specimens. I am extremely well pleased with them and with the transaction.

V. E. Thornburg
Connecticut

My spring order of Rhododendrons were such beautiful plants that I am placing another order for fall planting.

Mrs. P. G. Wall, Jr.
North Carolina

April, 1955

The Rhododendrons and Azaleas arrived in beautiful shape—as they always do—in spite of what was practically a heat wave. This is the most beautiful Irene Koster.

May, 1957

By the way, several years ago, we purchased Kluis Sensation and El Alamein Rhododendrons from you. Kluis bloomed last year and is a fine red. This year, in fact, right now, (May 18) El Alamein is in full bloom and is, in our opinion, an even better red—more vibrant and picks up the light. We have them in full sun.

October, 1957

The Ghent and other Mollis hybrids we received from you in May have done beautifully and are well-budded.

The World's Finest AZALEAS

Many garden lovers class these Azaleas at the very top in brilliance, range of color, and beauty of flower. In the months of April and May, they are a mass of strong colors—red, orange, yellow, gold, white, copper, bronze, pink, crimson, mauve, and variegated. We have fifty of the finest varieties blooming for six to eight weeks. First the Molles, then the Occidentales and then the Ghents and Knap Hills with the Occidentales still in flower. They like sun with plenty of moisture, but in the Mid-West where the air is dry and the sun burning, they prefer part shade. They like the same soil as Rhododendrons, but will stand more exposure. Plant at the same depth as they were at the Nursery. It is preferable to remove the seed pods after blooming. All large plants budded ready for Spring bloom.

HARDY GHENT HYBRIDS

Hybridizing of Azaleas started in Ghent, Belgium, in 1825. Since then they have been crossed and re-crossed many times to form our present varieties. These Pontica Hybrids or hardy Ghent Azaleas have a wide variety of strong colors, true and variegated. They are red, orange, yellow, light yellow, bronze, white, pink, crimson, mauve, purplish red and mixtures of colors. Their individual honey-suckle shaped flowers are smaller than the Molles and they are later to bloom than the Mollis or Occidentalis Hybrids. Good bloomers. They are hardy enough for the northern part of the United States. All budded ready for Spring bloom. Noted for their lasting qualities.

- * **BOUQUET DE FLORE.** Bright pink, pale pink and white stripes. Very beautiful. Very late. 9-12 in. \$3.00; 15-18 in. \$5.00; 18-24 in. \$6.00; 24-30 in. \$7.50; 30-36 in. \$9.00; 36-42 in. \$11.00.
- *** **COCCINEA SPECIOSA.** This is a lower, more branching and broader plant than Unique and blooms later. In fact, it is one of the latest to bloom. Its color is not as sharp and strong as Unique and a little darker in shade. It has orange and red and yellow markings with orange predominating. Same flower as Gloria Mundi, better shaped bush. 12-15 in. \$4.00; 15-18 in. \$5.00; 18-24 in. \$6.00; 24-30 in. \$7.50.
- ** **DAVIESII (M).** Creamy white, pale yellow eye, very hardy. Fine for woodland planting. 9-12 in. \$3.00; 12-15 in. \$4.00; 24-30 in. \$7.50; 30-36 in. \$9.00; 36-42 in. \$11.00.
- * **DR. CHAS. BAUMAN.** Deep blood red. Late. 18-24 in. \$6.00; 24-30 in. \$7.50; 30-36 in. \$9.00.
- * **FANNY.** A beautiful rose-pink. Early. 9-12 in. \$3.00; 12-15 in. \$4.00; 15-18 in. \$5.00.
- *** **GLORIA MUNDI.** The color of this bloom is very similar to Coccinea Speciosa, but the habit of growth is more spreading. Reddish orange predominates. Mid-season. 15-18 in. \$5.00; 18-24 in. \$6.00; 24-30 in. \$7.50.
- IGNEA NOVA.** Carmine-red, yellow lobe. Late. 9-12 in. \$3.00; 12-15 in. \$4.00.
- * **NANCY WATERER.** This has a large, bright, deep golden yellow flower with lighter shades. One of the best. Mid-season. 18-24 in. \$6.00; 24-30 in. \$7.50; 30-36 in. \$9.00.
- ** **NARCISSIFLORA.** AM 1954. A taller growing clear sulphur yellow. Double. Mid-season. 9-12 in. \$3.00; 12-15 in. \$4.00; 18-24 in. \$6.00; 24-30 in. \$7.50; 30-36 in. \$9.00.
- * **PALLAS (E).** Geranium red with orange blotch and a little earlier than the others. 9-12 in. \$3.00.
- SANG DE GENTBRUGGE.** Dark crimson. Late. 9-12 in. \$3.00; 12-15 in. \$4.00; 24-30 in. \$7.50; 30-36 in. \$9.00.
- ** **UNIQUE.** AM 1952. This is a very striking, strong, bright, deep buff-yellow, blushed and suffused orange. Large truss; open habit. A taller grower than the others and one of the very best. 18-24 in. \$6.00; 24-30 in. \$7.50; 30-36 in. \$9.00; 36-42 in. \$12.50; 42-48 in. \$15.00.

We received our Azaleas. They are just fine, came through in wonderful shape. We are so pleased with them. We appreciate your sending such nice plants.

IRENE KOSTER — Fragrant Occidentalis, Pink

BEAUTEOUS AND FRAGRANT OCCIDENTALIS HYBRIDS

Comparatively new in this country are these flower gems, which in the Spring present a mass of blooms in the softer, more refined shades and fill the air with delicate perfume. The different varieties form one of the loveliest groups of plants. Their shades range through pink, cream, white, yellow and soft orange, variegated and blended in pleasing harmony. Budded, ready for Spring bloom.

- ** **DELICATISSIMA.** Creamy white with pink and yellow and orange shades. 24-30 in. \$8.00; 30-36 in. \$10.00; 42-48 in. \$15.00.
- *** **EXQUISITA AM 1950.** This is the latest of the Occidentales to bloom. It has shades of pink and white and light yellow and cream, with pink predominating, and the leaves start their growth with the flowers still in bloom. 24-30 in. \$8.00; 30-36 in. \$10.00; 36-42 in. \$12.50.
- ** **GRACIOSA AM 1908.** Blooms of this variety have a sharper contrast of strong colors—creamy pink with orange and yellow markings. One of the best. Slower growing. 15-18 in. \$6.00; 18-24 in. \$7.00; 24-30 in. \$8.00; 30-36 in. \$10.00; 36-42 in. \$12.50.
- * **IRENE KOSTER.** This is the earliest of the Occidentales to bloom. It has shades of soft, light and dark pinks, and fills the air with fragrance. 9-12 in. \$3.50; 12-15 in. \$5.00; 15-18 in. \$6.00; 24-30 in. \$8.00; 30-36 in. \$10.00.
- ** **MAGNIFICA.** This variety is similar in color to Graciosa. Creamy white flushed pink with yellow and orange only softer color contrasts. 15-18 in. \$6.00; 18-24 in. \$7.00; 24-30 in. \$8.00.
- ** **SUPERBA.** This has the lighter shades like Exquisita only with an apricot blotch, being pink and cream and apricot, with pink predominating. 15-18 in. \$6.00; 18-24 in. \$7.00; 24-30 in. \$8.00; 30-36 in. \$10.00; 36-42 in. \$12.50.

A MOLLIS HYBRID AZALEA

KNAP HILL AZALEAS

This new strain of hardy deciduous Azaleas, developed at Knap Hill, Slocock and Exbury, England, is reputed to be the finest in the world. We have a large stock of plants raised from hand pollinated seed of the name Exbury varieties. They bloom at about the same time as the Ghent Hybrids. The flowers are large, brilliant with lasting qualities and range in all colors—red, yellow, apricot, pink, salmon, flame, orange, but these seedlings have not yet been separated into color groups. Prices of these selected seedlings: 12-15 in. \$2.25; 15-18 in. \$3.25; 18-24 in. \$4.25.

DOUBLE HYBRIDS Rustica Flore Pleno

This group has smaller individual flowers than the other hybrids, but they are double, colorful, fragrant and dainty. They are a mass of color. Hardy. Early flowering. Delightful. Stand sun well.

- ** **AIDA.** Rose, slightly tinted lilac. Spreading bush, long lasting flowers. 18-24 in. \$6.00; 24-30 in. \$7.00.

My Azaleas arrived in fine condition and were planted with great care. One of them is suddenly bursting out with buds about to open. I must say I have never seen such painstaking packing. If they do not succeed, it certainly will not be your fault. I also want to compliment you on your honest information in your catalogue.

A. P. Risser

Today I received the Azaleas you shipped me. They were on the road from Portland to Kansas City only four days. I have many varieties (some 60 kinds) which I have gotten from all over the United States over the last few years. Yours were the FINEST I have ever received and arrived in perfect condition. The method of packaging is perfect. I will order more next year.

HARDY EVERGREEN AZALEAS

THE EXTRA HARDY MALVATICA EVERGREENS

This is a relatively new group and is destined to have a permanent place in our gardens. They have larger flowers and larger bushes than the Kurumes. The plants will grow to about 4 feet in height and 5 feet across and are smothered with bright blooms in the Spring. They are very hardy and range in color through the various shades of pink and rose, orange and red. Fine for foreground and mass planting. Will stand full sun but the flowers last longer in part shade. Have grown in the coldest parts of Ohio, Illinois and Michigan. Budded and ready for bloom.
